

Declaration of conformity food contact

EU 1935/2004

Products

Coreline butterfly valves Fig 223 and 224 with PTFE seat.

Materials

Metallic parts stainless steel.

Seats PTFE.

Coreline hereby confirms that the butterfly valves are produced in materials suitable for contact with food as well as confirm that the valves are in conformity with the demands setout in the standard EU1935/2004.

Materials used in the production of Coreline butterfly valves are testet according to following standards EU 10/2011, EU 1282/2011, EU 1183/2012, EU 202/2014 and EU 1416/2016.

Production of the Coreline butterfly valves follows the guidelines for good manufacturing praxis set out in the standard EU 2023/2006.

The use of Coreline butterfly valves is not to exceed the temperatures/pressures stated in the Coreline brochures for each product – if in doubt, please consult us.

The declaration of conformity is given by Coreline A/S – contact us if need be for further details of the conformity or our products.
